Overview

I am Fullstack Software Engineer from Russia. I believe that development is more about problem solving and coding is a background action, so programming language is just a tool to solve specific problems. I prefer to take hard tasks because they help me to improve my skills under pressure. I have some volunteer projects development experience, freelance experience and experience in development applications for automation various everyday tasks. Based on the knowledge of software engineering I acquired at the university, I write clean and reusable code which is easy to maintain. I am also familiar with life cycle of software, stages of software development, requirements analysis, requirements specification, and methods of software design. I am native Russian speaker, I have intermediate level of English, B1 level of Czech. I eager to be a part of a big professional team with interesting projects.

Skills

Languages:

- Ruby
- JavaScript
- C

Tools:

- Ruby on Rails, RSpec, dry-rb
- ORM (ActiveRecorder, Sequel)
- HTML5, CSS3, Bootstrap
- ReactJS
- Git, Heroku
- Linux

Technologies:

- Object-Oriented Programming
- Design Patterns by GoF
- SOLID principles
- DRY, KISS, YAGNI, TDA principles
- Test-Driven Development (TDD)
- Cloud Computing
- REST

My mostly theoretical skills: CI/CD, Docker, Jenkins, Behavior-Driven Development

Experience

May 2019 - December 2019 Acquainted with basics of programming in the statically typed languages including C. Wrote several projects including university projects

January 2020 - April 2020 Developed several applications on pure Ruby with wide-range functionality which solves and automates everyday tasks I face

May 2020 - June 2020 Developed, scaled, and deployed multi-international telegram bot with high load (possibly 12k user requests per second). Managed to analyze business features even going beyond what was requested from the client

July 2020 - September 2020 Maintaining and Refactoring previous projects, deeping into Front End development, designed and developed several freelance projects as a Full Stack Developer.

Education

Brno University of Technology
Bc, Information Technology
2019 - 2021
